PROFESSIONAL SUMMARY

Data Analytics-focused Electronics and Computer Engineering student with hands-on project experience across SQL, Excel, and relational databases, extending into Power BI. Skilled at data cleaning, business-question-driven SQL analysis, and KPI dashboard design. Seeking internships in Data Analytics, Business Analysis, or BI.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, SQL

Data Analytics & BI: Microsoft Excel (Advanced, Power Query, PivotTables, PivotCharts, Slicers), Power BI, Data Cleaning, Data Visualization, Dashboard Development, KPI Reporting

Databases: MySQL, PostgreSQL, SQL Joins, CTEs, Window Functions, Stored Procedures, Triggers, Schema Design

Web Technologies: HTML5, CSS3

Core CS: DSA, DBMS, Operating Systems, AI/ML, Computer Networks, OOP

Tools: Git, GitHub, VS Code, MySQL Workbench, Power BI Desktop, Excel

EDUCATION

Thapar Institute of Engineering and Technology, Patiala, Punjab, India

B.Tech in Electronics and Computer Engineering (ENC) • CGPA: 8.37/10 • May 2027

PROJECTS

Monday Coffee Expansion Analysis | PostgreSQL, SQL, CTEs, Window Functions

- Solved 10+ real-world business questions using PostgreSQL to identify optimal Indian cities for Monday Coffee's retail expansion, analyzing sales, customer, product, and city-level data.
- Wrote SQL queries using multi-table JOINS, CTEs, and window functions to rank cities by estimated consumers and rent-to-sales ratio, shortlisting the top 3 cities for launch.

FNP Sales Analytics Dashboard | Excel, Power Query, PivotTables, Slicers

- Built an interactive Excel dashboard for a gifting e-commerce business, visualizing revenue, order volume, and top-selling products using PivotTables, PivotCharts, and slicers.
- Cleaned and transformed raw transactional data with Power Query (M language), resolving nulls, duplicates, and inconsistent date formats prior to analysis.

Domino's Store Sales Analysis | Power BI, Excel, SQL

- Analyzed 12+ months of transactional sales data, uncovering a 23% revenue spike during promotional periods using time-series analysis.
- Designed an interactive Power BI dashboard with 10+ KPIs (Revenue, AOV, Order Volume, Growth Rate); cleaned 1,500+ null values in Excel, improving data quality by 98%.

E-Commerce Customer Analytics Dashboard | Power BI, Excel, SQL

- Built an executive-level Power BI dashboard aggregating 50,000+ transactions to surface insights on customer acquisition, retention, and lifetime value (CLV).
- Conducted RFM customer segmentation into 5 cohorts; tracked 8 revenue KPIs and identified a 17% retention drop linked to checkout friction.

Bookstore Management System | MySQL, SQL

- Engineered a normalized relational database schema across 8+ tables (3NF); implemented multi-table JOINS, subqueries, and 5+ stored procedures/triggers for automated alerts.
- Optimized query performance via indexing, reducing average execution time on datasets of 10,000+ records.

Road Accident Dashboard | Excel, PivotTables, PivotCharts, KPI Cards

- Built an interactive Excel dashboard analyzing a dataset of 3.7 lakh+ accident records, uncovering trends across time, location, and severity using PivotTables, PivotCharts, KPI Cards, Slicers, and Timelines.
- Cleaned and standardized the raw dataset prior to analysis, resolving missing values, duplicates, and inconsistent formatting to ensure accuracy before building the dashboard.
- Surfaced accident trends by time period and location, enabling data-driven insights for road safety analysis.

ACHIEVEMENTS & CERTIFICATIONS

- CGPA 8.37/10; solved 100+ DSA problems across platforms (arrays, graphs, DP, tree traversals).
- Independently designed and delivered 5 end-to-end data analytics/database projects spanning SQL, Excel, and Power BI.
- Deloitte Data Analytics Job Simulation & Deloitte Cyber Security Job Simulation — Forage • Oracle Cloud Infrastructure AI Foundations — Oracle
- PCB Design and Fabrication (Thapar) • Shape Detection Using Python (OpenCV) • IoT Fundamentals • WordPress Website Development
